June 14th, 2019 - Prof Clayton did an excellent job with this text and it still sits on my
bookshelf It's clear well written and covers nucleosynthesis stellar and galactic chemical
evolution However it's really quite dated now and I would hesitate to recommend it as an
introduction now

May 28th, 2019 - These numbers are from Clayton Principles of Stellar Evolution and
Nucleosynthesis 1968 so are slightly out of date The lifetimes of course are condition
dependent The values quoted here are appropriate for \( ^{100} \) T6 15 and X Y 0 5 The rst
thing to notice is the extremely short lifetime of deuterium
